

JONATHAN VEYKKAN

PROFESSIONAL SUMMARY

Hi my name is Jonathan Veykkan, I am a Computer Science Engineering student from Model engineering college, I have a diploma in Electronics and Communication engineering from SNM polytechnic college. I have successfully completed internships from BSNL and purpose technologies where I got hands on experience in the hardware and software fields. I have strong technical skills, a passion to learn new things and the ability to work in a team oriented environment. I am eager to work on projects that challenge me and help me grow as an engineer

WORK EXPERIENCE

INTERN

BSNL

- Gained practical knowledge of communication systems, including copper-based transmission, optical fiber communication, and splicing techniques.
- Observed and understood the real-world operations of a government-run telecom network, including signal transmission, network maintenance, and infrastructure management.

INTERN

Purpose technologies

- Worked with IoT devices, Arduino, microcontrollers, and Python, gaining hands-on experience in embedded systems and smart technology applications.
- Gained exposure on the role of a project manager, 3-D printing, and the end-to-end development cycle of tech-based solutions in a collaborative team environment.

ACADEMIC HISTORY

Model Engineering College (currently pursuing)

Btech in Computer Science and Buisness Systems

SNM Polytechnic College

Diploma in Electronics and Communication Engineering

- CGPA: 8.24
- Department Topper
- Best outgoing student

PROJECTS

- Automatic Landslide Detection System
- 4x4x4 LED cube using aurduino
